## LIVE CONSERVATION WORK AT WILTON HOUSE

This week, Wilton House is in a position to display live conservation work which is being carried out within the collection. Dr Campbell Norman-Smith FRSA from Granary Conservation in Lincolnshire, is working on the collection with recently graduated students from a BA Programme in Furniture Conservation and Decorative Arts. Assisting him in this is Mr Paul Tear MBE, formally Head of Conservation from The Wallace Collection. The graduates will be working on a very broad range of objects from within the collection. This is a project that has been running now, for over 5 years but this is the first opportunity for the public to see what is going on.
